

PHASE 1

This area is where the majority of the first stage work will be performed:

- **Installation of erosion control measures.**
- **Traffic realignment for installation of the new bypass and Temporary Pavement Construction.**
- **Installation of the Storm Pipe.**
- **Connection to existing water main and Partial Removal and Realignment of the water service to the church by United Water's Subcontractor.**
- **Installation of the new bypass and construction of new church driveway.**
- **Island Removal and placement of temporary pavement.**

There will also be new storm sewer installed from Berryhill Road intersection to opposite end of project during this phase

There will also be temporary pavement placement in various locations from Kepler Masonry to Ron's Hair Styling, and from Fabric Gallery to Pamper You Salon

(Subject to change due to weather or unforeseen conditions.)
